

02 Docker Machine

What is Docker Machine?

- It is a tool.
- It helps to create Docker hosts on local Mac or Windows.
- Or in your Data Center, Cloud Provider(AWS, Digital Ocean etc)
- It is currently the only way to run Docker on Mac or Windows

Installation

- <https://www.docker.com/products/docker-toolbox>

How to Use it?

- `docker-machine ls`
- `docker-machine create --driver [provider] [machine-name]`
- `docker-machine start [machine-name]`
- `docker-machine stop [machine-name]`
- `docker-machine env [machine-name]`
- `docker-machine ip [machine-name]`

Stop Your Talking

Show Something Interesting Man.. :)

Give it five Minutes
